## Suppliers of Materials and Services for Use with Aristech Surfaces Continuous Cast Acrylic Sheet Products

Aristech Surfaces Crosslinked Acrylic Sheet products, Altair® I-300, Altair® Plus, Quarite®, Quarite Plus®, Quarite Select®, Quarite Select Plus®, and Acrysteel® M are unique formulations that offer users a molecular structure that can be easily thermoformed into practically any shape. These products can then be reinforced with various materials such as FRP, Urethane, Polyurethane Foams, or Polyester-Polyurethane Hybrid Foam Systems. A major application for these products are in plumbingware (i.e., bathtubs, lavatories, modular tub/showers, spas, etc.).

Aristech Surfaces GPA and Acrysteel® IGP are general purpose acrylic sheets, and are solvent cementable. GPA is inventoried in many colors. Both are offered in many sizes and thicknesses for the sign, glazing and distribution markets.

### Sources of Supply

As a service of our customers, Aristech Surfaces published this list of sources of supplies for use with Aristech Surfaces Acrylic Sheet products. It is not intended to be a complete list of either products or sources. We have not tested all of the products and we make no guarantee that any product will perform satisfactorily. We suggest that the prospective user conduct his own tests before starting use on a large scale. In all cases, the manufacturer's instructions should be followed. If in doubt, contact the manufacturer for his recommendations or warranties.
