ENRICHED COLOR TECHNOLOGY™

Delve deeper with Avonite Surfaces® innovative Enriched Color Technology™. Our patent-pending Enriched Color Technology™ not only benefits the tone and richness of the color, it also provides the most luxurious surface finish. The technology is embedded throughout the material increasing the performance characteristics with a higher scratch resistance and strongest surface finish yet.

"The depth of the color, and bold contrast the Enriched Color Technology™ has provided my customers is outstanding. Even after thermoforming the uniformity is unmatched. Definitely a step forward for dark solid surface colors. Well done."

Tom Pinske, Founder of The Pinske Edge

Standard SHEET SIZE

30 in. x 144 in. x 12 mm.

Custom Sizes available upon request
(minimum order quantity required on Custom)

ADHESIVE MATCH CHART

COLOR	ADHESIVE NAME
ECLIPSE 8240	CLEAR / SM6006

BENEFITS

- Increased Scratch Resistance
- Thermoformable for curved and custom applications
- Non-porous and hygienic surface
- Easy to clean, and finish to Matte, Satin or Gloss finishes
- Stain resistant
- NSF Certified Food Zone Safe
- Bacteria- and chemical-resistant
- Readily repairable surface
- Inconspicuous seams
- 15-year warranty
